

The After Effects of Pneumonia

This is No. 2 of a series of advertisements, prepared by a competent physician, explaining how certain diseases which attack the air passages—such as Pneumonia, Influenza, Whooping Cough, Measles or even a long continued Cold—often leave these organs in an inflamed, congested state, thus affording a favorable foothold for invading germs. And how Vicks' Vapo-Rub may be of value in this condition.

Pneumonia attacks the air cells of the lungs. An inflammation is set up and matter is thrown off which causes the air cells to solidify, thus preventing the natural flow of blood thru the lungs. This "backing up" of the blood causes the heart to pump harder, just as stepping on a hose increases the water pressure, which is the reason why, during this disease, the physician watches the overburdened heart so carefully.

After recovery the lungs are filled with a mass of wreckage—the debris of the battle—which must be gotten rid of by a process known as resolution. Frequently, inflamed spots remain, congestion persists, cough hangs on, and the least exposure brings on a cold that is hard to get rid of. If neglected, such damaged air passages may easily develop serious disease of the lungs.

Such cases should always continue under a physician's care and frequent examinations should be made to see that nature is

properly continuing the rebuilding process.

Nightly applications of Vicks' Vapo-Rub will aid nature in this work. Because Vicks acts locally by stimulation thru the skin to draw out the inflammation, attract the blood away from the congested spots and relieve the cough. In addition, the medicinal ingredients of Vicks are vaporized by the body heat. These vapors are breathed in all night long, thus bringing the medication to bear directly upon the inflamed areas.

Vicks should be rubbed in over the throat and chest until the skin is red—then spread on thickly and covered with hot flannel cloths. Leave the clothing loose around the neck and the bed clothes arranged in the form of a funnel so the vapors arising may be freely inhaled. If the cough is annoying, swallow a small bit of Vicks the size of a pea.

Samples to new users will be sent free on request to the Vicks Chemical Company, 232 Broad Street, Greensboro, N. C.

PAINTING—PAPERHANGING

But One Way Is Better.

A bluff, hearty old bachelor friend of the family, trying to get on terms with the son of the house, asked him, "Have you practiced any fancy methods of skating, sonny?" "No," said sonny, "I can skate only two ways as yet." "Ah, and which are they?" "Standing up and sitting down," said sonny.

Today's Events

William H. Crane, dean of the American states, is 75 years old today. Denver will put daylight-saving in effect at midnight tonight by setting the clocks ahead one hour.

The annual convention of the National Print Cutters' Association will begin its sessions today in New York city.

Fresno, California, will hold its annual Raisin Day Carnival today, with Pauline Frederick, the popular actress as carnival queen.

Harvard men from all sections of America will gather today in Washington, D. C., for the annual meeting of the Associated Harvard Clubs.

Today has been set as the date for dedicating the Grand Canyon National Park in northern Arizona, created by act of Congress a year ago.

Former President William H. Taft and other notable speakers are to be heard today at the fifty-second anniversary exercises of Hampton Institute.

Government ownership of the railroads is to furnish the subject for a triangular debate this evening between student teams of Colby College, Tufts College, and Clark University.

Post-war problems as affecting high costs will be discussed by American and European economists, bankers and educators at the English meeting of the American Academy of Political Science, to be held today in New York city.

Of Interest to Women

More than one hundred women are members of town councils in Sweden.

An indoor golf club for women is a new and flourishing institution in London.

It is only within the last fifty years that Turkish women have learned to read and write.

The National Council of Danish Women comprises 35 associations, with a membership of about 40,000.

Out of 336 professions and trades followed in the Netherlands nearly half are practiced by women.

Pearl White, famous as a motion picture star, began her career as a trapeze performer with a traveling circus.

A woman—Joan of Arc—saved

France from becoming part of Britain and another woman, Catherine the Great, set Russia high among the nations.

The University of New Zealand was the first within the British empire to recognize women's intellectual equality with men by granting them degrees.

In Finland fifty years ago there was not a single high school for girls, and now most young women whose parents can afford it are given a university education.

Miss Helen B. Hight, New Orleans' only woman barber, runs a no. 10 shop. She is of the opinion that women make better barbers than men because they have a lighter touch.

Selma Lagerlof, the Swedish novelist, was the first woman to be elected a member of the Swedish Academy of Letters, and the only woman to be honored with the Nobel Prize for literature.

Jewett has the distinction of being the first municipality of Texas to turn its city government over to women. In the recent election women were

chosen to fill practically all the city offices, including the mayoralty.

The game of billiards is all the rage among English women—at present, London has scores of billiard halls that cater exclusively to the patronage of the feminine sex. These parlors are equipped with green-cloth tables of regulation size, except that they are slightly lower than the usual table for the better convenience of the woman player.

A beautiful American actress with a fortune of more than a million dollars is said to have crossed the Atlantic with the intention of capturing Georges Carpentier as a husband, but she was powerless against the bewitching blue eyes, natural charms, and accomplishments of Georges' Elisee, the little French girl who became the bride of the famous pugilist.

"In The Day's News," Samuel McCune Lindsay, president of the American Academy of Political Science, which meets in New York today to discuss the high cost of living and other post-war problems, is a noted American sociologist and educator. A native of Pittsburgh, he received his Ph. D. degree from the University of Pennsylvania at the age of 20 and then went abroad, where he spent five years in post-graduate studies at the universities of Halle, Berlin, Vienna, Rome and Paris. For some time after his return to America he filled the chair of sociology at the University of Pennsylvania, from which he resigned to accept his present post as professor of social legislation in Columbia University. In recent years Professor Lindsay frequently has been called upon by the Federal Government to serve as an expert on important commissions for the investigation of social, financial, and economic problems.

Today's Anniversaries
1732—Samuel Vetch, first British governor of Nova Scotia, died in London. Born in Edinburgh, Dec. 9, 1668.

1803—By purchase, the United States acquired the claims of France to Oregon.

1841—New Zealand was declared independent of New South Wales.

1870—Charleston became the seat of State government of West Virginia.

1870—Sarah J. Hale, who edited the

Kind Sir: Have taken your Arbolone Tablets for obesity and in six months reduced from 225 pounds to 132 pounds. I cannot say enough for them, and anybody who is fat should take them. My health is better than ever, etc."

Tablets Arbolone enjoy the largest sale of any obesity medicine and they deserve it. Sold by all well stocked druggists in sealed tubes with full directions.

NOPE! YOU CAN'T FOOL 'EM!

When Twenty-five Millions Buy "Cascarets" They Must be "Just-Right" for Liver and Bowels

Twenty-five million boxes of Cascarets were sold last year to folks who wanted relief from Constipation, Biliousness, Indigestion, Gases, Colds and Sick Headache without being shaken up and sickened all the next day. Cascarets work while you sleep, removing the toxins, poisons and sour indigestible waste without gripping or inconvenience. Cascarets regulate by stimulating the liver and strengthening the bowel muscles. They never weaken or upset you like Salts, Calomel or violent Pills. Cascarets cost so little too.

HOMES FOR HOMESEEEKERS

I am able to offer to people seeking homes an excellent and in view of present housing conditions a remarkable list of desirable residence property as follows:—

PARCEL 1—A two story twelve room house with two complete bath rooms in addition. Seven rooms on first floor, five on second. Steam heat, electric lights, garage, good sized lot. All in excellent condition.

PARCEL 2—An eight room house with bath. Lot 4 rods by 9. A fine little place for medium sized family.

PARCEL 3—A two story and attic 12-room house with bath, electric lights and gas. Attic could be finished for additional rooms if desired. Excellent cellar. Lot 54x90. Suitable for good sized family and particularly well adapted for taking roomers.

PARCEL 4—Two story, six room house with bath.

PARCEL 5—A two story, slate roofed double house, with six rooms and bath on each side. With this house there is a barn and good lot.

PARCEL 6—A ten room house which was not built for double house but which is well adapted for two families.

PARCEL 7—A 1½ story, slate roofed seven room house with bath.

PARCEL 8—A two story, slate roofed, eleven room house with bath, steam, electric lights and gas, also barn and large lot.

PARCEL 9—A two story, slate roofed, seven room dwelling with bath, gas and electric lights, good lot and garden.

PARCELS 8 and 9 will not be sold separately.

PARCEL 10—A double house containing six rooms and bath on one side and five rooms and bath on the other.

PARCEL 11—A single house with six rooms, toilet but no bath.

PARCELS 10 and 11 must be sold together. The buildings stand on a lot with street frontage of 95 feet and depth of about 200 feet.

All the above property is well located in good neighborhood in Bennington village and all of it in fairly central location.

A Talk About Talking Machines

With the hundred and one advertised talking machines and their extravagant claims of superiority, the prospective buyer of a machine becomes somewhat confused as to just what represents the greater value. Naturally a man wants to get the best he can afford but is frequently led to believe, either that he cannot afford a Victrola, or that some other machine is better for the same money.

In this connection we want to repeat what has been demonstrated over and over again at public exhibitions and in private homes, in competition with all other machines, the Victor machine has for years been recognized as the best musical instrument ever produced.

Claims are sometimes made by others that they have instruments equal to the Victrola, but no reliable company has yet claimed to have produced one superior to it. It is the standard disk machine of the world and that statement cannot be truthfully denied.

Most of the machines on the market to-day are what are termed "assembled machines" and the only reasons for their existence are, first: the inability of the Victor company to produce machines and records sufficient to anywhere meet the demand, and second: the basic patents have expired so that anyone can buy the different parts, assemble them, and market a machine. This is the process for creating a "new" machine in the majority of cases: The cabinet is made in some wood working plant, then a motor is purchased somewhere in America, or more probably imported from Switzerland, France or Germany; a "Universal" tone arm (one that will play everything from a Victor record to a tin pie-plate) is purchased from another manufacturer, the whole is "assembled" and we have a "Victrola," a "Dardola," or some other. Ola thing that is "guaranteed to give satisfaction." Of course these machines will reproduce the human voice and do most of the stunts that a VICTROLA will perform, but if anything about the motor or reproducer goes wrong; good night! You will have to wait awhile before you can get the part to fix it and then you have got to have it put together by a machinist. In a word, the wearing qualities are not there, comparatively no thought or skill has been employed in its construction and you are merely buying an imitation of the real thing and paying just as much for an inferior article.

Now every part of the Victrola is made in the Victor factories. The Victor company owns its own lumber on the stump. It is cut, sawed, seasoned and delivered to its own special machines by Victor employees. Every part of the motor, tone arm, reproducer, etc., is manufactured from the raw material in the Victor factories. They make needles and records especially for use on the Victrolas and it goes without saying that they make the best machines they can produce for the simple reason that their interest in you does not cease with the sale of the machine. They want it to be absolutely satisfactory for years to come as they want to sell you records for it also. A sweeping guarantee goes with the machine, to replace free of charge any defective part, and should a break occur one year or twenty-five years hence you can duplicate the part in twenty-four hours and it will not require the services of an expert mechanic to put it in. Everything about the machine is standardized and easily replaced.

The VICTROLA has been selected by the leading talent in the world to reproduce their music. Not because of the money they receive for it, but as a matter of professional pride they want the company and machine that can do them the greatest justice, in preserving for future generations as well as to entertain the present, their marvelous singing and playing.

The Victrola will play also any lateral cut record on the market, including the celebrated Columbia records. The prices of the VICTROLA are as low as any other make, ranging in price from \$25.00 to as high as your pocketbook will warrant purchasing.

Before investing your good money, satisfy yourself that the above statements are true by investigation. Compare the inside heart of the machine with other makes, as well as the tone, outside appearance, quality of material, etc. If you are not blind or deaf you are sure to decide in favor of the VICTROLA. Sold on the easy payment plan by

GRISWOLD
